## Care Sheet Spirea - Spirea japonica

Origin: Japan

### General info

Hardy flowering shrub. Keep outside all year

### Over Wintering

Keep outdoors during winter months so that they can experience a dormancy or rest period. During this period, your bonsai should be protected from drying winds and extreme cold conditions.

This can be achieved by utilizing cold frames, window wells, enclosed unheated rooms, shed or garage with windows, or mulched beds. The bonsai should be checked regularly for water when temps are above freezing.

### Lighting

Half to full day sun

### Watering

Water when soil on top is starting to dry. When you water make sure you completely wet all the soil in the pot every time you water. Don't pour in a little water every day

### Feeding

Spring thru fall. You can use house plant or nursery fertilizers. Follow the label for rates and application times.

### Training

Cut back hard after flowering for rebloom and cut back early spring

### Repotting

Every year in spring
